National Terrorist Advisory System

On April 26, 2011, the National Terrorism Advisory System (NTAS) replaced the original color-coded Homeland Security Advisory System (HSAS) with a two threat category system as shown below.

NTAS Alerts will be organized into the following two threat categories:

- **Imminent Threat Alert** - Warns of a credible, specific, and impending terrorist threat against the United States.
- **Elevated Threat Alert** - Warns of a credible terrorist threat against the United States.

The NTAS will more effectively communicate information about terrorist threats by providing timely, detailed information to the public, government agencies, first responders, airports and other transportation hubs, and the private sector. The NTAS recognizes that Americans all share responsibility for the nation's security, and should always be aware of the heightened risk of terrorist attack in the United States and what they should do.

To find out the county's current threat level, go to www.fairfieldema.com to see the information there.
